

January 2026

To our esteemed business partners:

SDG Co.,Ltd.

NOTICE : Price Revision

We would like to express our sincere gratitude for your continued patronage and support.

As you are aware, we continue to face a challenging business environment due to the ongoing surge in raw material and component costs, compounded by rising energy prices and logistics expenses.

To mitigate these impacts, we have made every effort to reduce production costs through in-house manufacturing of materials and parts, as well as by streamlining operations and cutting expenses.

However, these rising costs have reached a level that can no longer be absorbed through internal efforts alone, making it extremely difficult to maintain our current pricing.

Consequently, in order to ensure the continued quality of our products and a stable supply, we have made the difficult decision to revise our prices as below.

Details

- **1. Effective Date :** Applicable to all orders received on or after April 1, 2026.
- **2. Affected Products :**
 - All blower models (including optional parts).
 - Select environmental improvement equipment models, optional parts, and consumables.

*Note: Prices for certain products that were revised in 2025 will remain unchanged at this time.
- **3. Price Adjustment :** An increase of approximately 2.8% to 10% of the current purchase price.

*Note: Custom-made products, optional parts, and consumables may exceed the above percentage increase.
- **4. Shipping Costs :** We will revise our “Standard Shipping Rates” which represent the portion of freight costs borne by our customers.

*Note: These rates are determined by our company policy and do not reflect the actual raw freight costs.

For inquiries regarding this matter, please contact your sales representative.

Kind regards
