Mistrésa Selecting Method

Choose according to your purpose

[Motor output from 0.2 kw to 2.2 kw]
 [Two types of Front filters and 3 types of End filters]
 [Both Horizontal and vertical mounting]
 In total you can choose between 60 combinations.

Front demister	Front filter	Taper cone	End demister	End filter
<p>Corresponds to water-soluble mist. Maintenance easy. Dust is not suitable. Doesn't trap dust. Low amounts of mist</p> <p>water-soluble mist low</p> <p>Maintenance easy</p>	<p>Corresponds to mist containing dust (chip fragments), washable, needs to be replaced when clogged</p> <p>all mist abundant</p> <p>dust abundant</p> <p>Maintenance necessary</p>	<p>Mist particles collide on the taper cone. Coming together on larger droplets falling down by their own weight</p> <p>water-soluble mist low</p> <p>Maintenance free</p>	<p>It corresponds to water-soluble mist, maintenance is easy, dust unsuitable, less mist</p> <p>water-soluble mist low</p> <p>Maintenance easy</p>	<p>Corresponds to mist containing dust (chip fragments), needs to be replaced when clogged</p> <p>all mist abundant</p> <p>Maintenance necessary</p>

Choose the right model for your application

With motor output ranging from 0.2 kW to 2.2 kW, two filter box parts, and three mist collector parts, there are over 60 combinations (including both horizontally and vertically installed models) to choose from.

CRM - H04 - S11

①
② ③ ④

- ① Output (H02, H04, H07 H15, H22)
- ② Horizontal (S) or vertical (V) installation
- ③ Demister (1) or filter (2)
- ④ Taper cone (1), demister (2), or filter (3)

		Back	Mist collector side		
			1	2	3
Filter box side	1	Front demister	Taper cone	End demister	End filter
	2	Front filter	Type 21	Type 22	Type 23

Choose by working chamber volume

If the mist source is covered

Working chamber volume (m³) = W × L × H
 Airflow volume (m³/min) = Working chamber volume × test coefficient*1

W: Working chamber width (m)
 L: Working chamber length (m)
 H: Working chamber height (m)

*1 Test coefficient

- If door is open at least 15 sec. after work is complete: 4
- If door is open at least 10 sec. after work is complete: 6
- If door is open in less than 10 sec. after work is complete: 8

Contact us for more information if the mist source is exposed.

- Use the product for collecting dry, non-explosive dust.
- Do not use the product in places where flammable, explosive or corrosive mist, smoke or gas is accumulated or located nearby.

**WR-100W
WR-200W**

Improving air conditioning and heating efficiency

Inducing movement of hot air / steam

Supply air locally

Purposes

1. Improves efficiency of air-conditioning equipment
2. Guides heat and steam
3. Locally supplies air

Specification

Model	Phase	Output (kW)	*Frequency (Hz)	*Voltage (V)	Rated current (A)	Noise (dB (A))	Blowing angle (°)	Weight (kg)
WR-100W	Single Phase	0.1	50	220	1.0	56	35	15
WR-200W		0.2		with plug	2.2	66		17

* Can change to another voltage; up to 240 V 50/60 Hz

WINDBAG™

WB-02

Features

1. Powerful wind source
2. Adjustable discharge angle
3. Robust
4. Small and lightweight

Specification

Model	*Power Supply	Output (kW)	*Frequency (Hz)	Current (A)	Maximum Airflow (m³/min)	Weight (kg)	Cord Length (m)
WB-02T	220V Single Phase	0.2	50	1.0	8.5	10	7

* Can change to another voltage; up to 240 V 50/60 Hz
